

1. Game: World 1

After downloading and opening the game, I play and collect all of the flag's parts until the last opponent, which cannot be defeated.

I saved the game and closed it, I noticed a folder named 'save'.

I open a save editor online and upload my save file earlier.

I buff my stats all to 999 and download the file.

Param set #1 (You):

MHP	<input type="text" value="999"/>	MMP	<input type="text" value="999"/>	ATK	<input type="text" value="999"/>	DEF	<input type="text" value="999"/>
MAT	<input type="text" value="999"/>	MDF	<input type="text" value="999"/>	AGI	<input type="text" value="999"/>	LUK	<input type="text" value="999"/>
MyHP	<input type="text" value="999"/>	MyMP	<input type="text" value="999"/>				

I put the save file back into the 'save' folder and load the game once more.

I defeated the last guy with ease and combined all of the flags.
