1. **Forensic: I Cant Manipulate People**
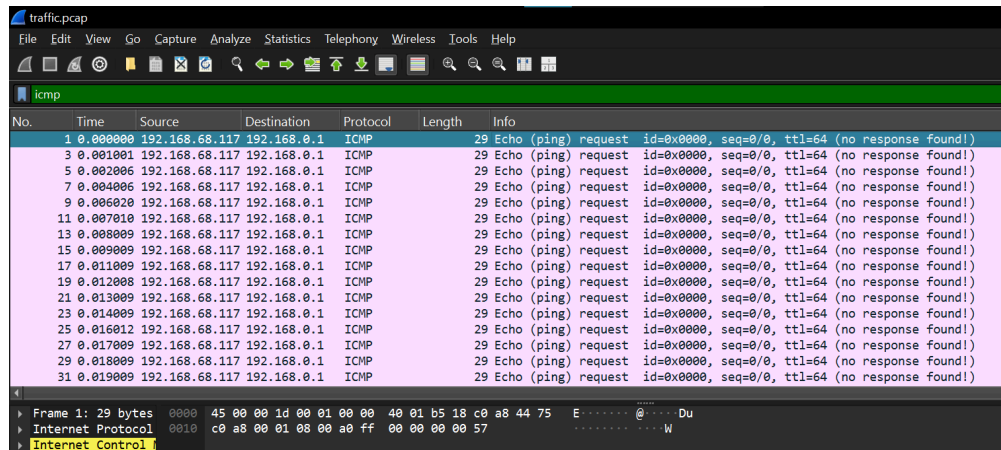

After downloading the file, I got a file named *traffic.pcap*.
I opened the file with Wireshark and noticed the first ICMP packet had 'W' at the end of it.
I filtered the traffic to ICMP and noticed that each letter of the flag is on the last bit of each packet. So again, I don't know any other convenient ways so I just manually arranged the flag.

Flag: WGMY{1e3b71d57e466ab71b43c2641a4b34f4}
